## CLARiiON Replication Software CLARiiON Training for Engineering

### Lab 03 – SAN Copy Configuration and Management

#### Summary:

In the first part of this exercise, you will create a lab configuration to support remote replication using SAN Copy and MirrorView. After the lab is setup, you will configure and perform a full remote copy of a LUN to a second CLARiiON using SAN Copy, followed by an incremental copy using Incremental SAN Copy (ISC). Operations will be performed using EMC ControlCenter Navisphere Manager and CLI.

The exercise is broken into three parts: Lab Preparation, Remote Full SAN Copy, and Incremental SAN Copy.

#### Objectives:

Following this exercise, participants should be able to:

- a) Merge two separate lab configuration into a single SAN fabric.
- b) Merge Navisphere Security domains for two lab groups.
- c) Configure SAN Copy connections.
- d) Create a Remote SAN Copy Session using the Wizard.
- e) Create and manage an Incremental SAN Copy Session.
- f) Use the admhost utility to manage and control host volumes used in a SAN Copy scenario.

*A Handbook for EMC Testing and Measurement* David Morgan, 1994-06-30 This major reference book is aimed at engineers and technical managers concerned with EMC electromagnetic compatibility It explains why EMC testing is necessary what standards must be met how such testing is carried out and therefore how to prepare for it what accuracy and repeatability can be expected and when to test

*Electromagnetic Compatibility for Space Systems Design* Nikolopoulos, Christos D., 2018-03-02 In the aerospace industry avoiding operating issues especially in regard to space missions and satellite structures is crucial The vast majority of these issues can be traced to disturbances in the electromagnetic fields used Electromagnetic Compatibility for Space Systems Design is a critical scholarly resource that examines the applications of electromagnetic compatibility and electromagnetic interference in the space industry Featuring coverage on a wide range of topics such as magnetometers electromagnetic environmental effects and electromagnetic shielding this book is geared toward managers engineers and researchers seeking current research on the applications of electromagnetic technologies in the aerospace field

*Electromagnetic Compatibility in Railways* Ade Ogunsola, Andrea Mariscotti, 2012-08-14 A railway is a complex distributed engineering system the construction of a new railway or the modernisation of a existing one requires a deep understanding of the constitutive components and their interaction inside the system itself and towards the outside world The former covers the various subsystems featuring a complex mix of high power sources sensitive safety critical systems intentional transmitters etc and their interaction including the specific functions and their relevance to safety The latter represents all the additional possible external victims and sources of electromagnetic interaction EMC thus starts from a comprehension of the emissions and immunity characteristics and the interactions between sources and victims with a strong relationship to electromagnetics and to system modeling On the other hand the said functions are achieved and preserved and their relevance for safety is adequately handled if the related requirements are well posed and managed throughout the process from the beginning The link is represented by standards and their correct application as a support to analysis testing and demonstration

what to do and how to do it Only a basic knowledge of math electronics and a basic understanding of EMI EMC are necessary to understand the concepts and circuits described Once EMC troubleshooting is demystified readers learn there are quick and simple techniques to solve complicated problems a key aspect of this book Simple and inexpensive methods to resolve EMI issues are discussed to help generate unique ideas and methods for developing additional diagnostic tools and measurement procedures An appendix on how to build probes is included It can be a fun activity even humorous at times with bizarre techniques i e the sticky finger probe
