Electoral Systems and Political Transformation in Post-Communist Europe S. Birch, 2003-11-25 *Electoral Systems and Political Transformation in Post Communist Europe* assesses the influence of electoral systems on political change in 20 post communist European states The main finding is that electoral institutions have systematic effects on the formation of representative structures Party enabling aspects of electoral laws such as list proportional representation tend to foster popular inclusion in politics and institutionalized party systems whereas politician enabling rules such as single member districts and ballots that allow voters to select individuals often favour the development of weakly structured systems and high levels of popular exclusion from the representative process

The Politics of Electoral Reform in Central Europe since 1989 Jakub Charvát, 2023-11-06 This book on the politics of electoral reform in Central Europe since 1989 explains by whom why and how the electoral rules were changed in Central Europe in the post Communist period Examining the contextual factors affecting underlying and or initiating these changes the book identifies main actors their motivations and other circumstances surrounding the electoral reform processes It further explores their political consequences particularly on proportionality and personalization Based on a detailed analysis of electoral reform processes in Czechoslovakia Czechia Hungary and Slovakia over the past thirty years the book discusses how the politics of electoral reform in Central Europe is mostly driven controlled and decided by politicians with other actors being either overlooked or ignored Finally it argues that most of the cases were imposed by an elite majority with the sole exception of the Czech Republic where the politics of electoral reform were influenced by the intervention of the constitutional court as an external actor The book will appeal to students researchers and scholars of political science interested in a better understanding of electoral politics in general as well as democratic transformation processes and electoral reform in Central Europe

issues such as the diverse manifestations of non conformity among different strata of the population the complex relationship between Moscow and the national Communist Parties the loosening of Soviet control after 1985 and everyday resistance to state authority This book offers a firm grounding in the tumultuous decades of communist rule which is essential to understanding the contemporary politics of Eastern Europe **Annual Review of Political Science** ,2007 The mission of Annual review of political science is to provide systematic periodic examinations of the field through critical authoritative reviews The comprehensive critical review not only summarizes a topic but also roots out errors of fact or concept and provokes discussion that will lead to new research activity Each review contains title author s key words abstracts review and bibliography **American Book Publishing Record** ,2003 **The British National Bibliography** Arthur James Wells,2002 *Geneza i ewolucja systemów wyborczych w państwach Europy środkowej i wschodniej* Wojciech Sokół,2007
