**Public Procurement and the EU Competition Rules** Albert Sánchez Graells, 2015-06-25 Public procurement and competition law are both important fields of EU law and policy intimately intertwined in the creation of the internal market Hitherto their close connection has been noted but not closely examined This work is the most comprehensive attempt to date to explain the many ways in which these fields often considered independent of one another interact and overlap in the creation of the internal market This process of convergence between competition and public procurement law is particularly apparent in the 2014 Directives on public procurement which consolidate the principle of competition in terms very close to those advanced by the author in the first edition This second edition builds upon this approach and continues to ask how competition law principles inform and condition public procurement rules and whether the latter in their revised form are adequate to ensure that competition is not distorted The second edition also deepens the analysis of the market behaviour of the public buyer from a competition perspective Proceeding through a careful assessment of the general rules of competition and public procurement the book constantly tests the efficacy of these rules against a standard of the proper functioning of undistorted competition in the market for public procurement It also traces the increasing relevance of competition considerations in the case law of the Court of Justice of the European Union and sets out criteria and recommendations to continue influencing the development of EU Economic Law

**Dawn Raids Under Challenge** Helene Andersson, 2018-06-28 This book examines the European Commission s dawn raid practices in competition cases from a fundamental rights perspective In recent years the Commission has adopted a new and more aggressive enforcement policy amid a growing awareness that cartels and abuse of market power represent an economic harm and need to be punished In response enforcement has been strengthened by the grant of more wide reaching powers to competition authorities But how does this impact on the framework of fundamental rights This study seeks to answer that question by examining the obligations imposed by the Charter and the ECHR and the response of the Luxembourg and Strasbourg Courts It shows that where the Strasbourg Court has managed to strike a balance between efficiency concerns and the rights of undertakings the EU courts judicial control is not equally balanced This book is an essential and timely examination of this important question Michigan Law Review ,2017-04 **The New Law Journal** ,1995 Walford's Guide to Reference Material: Social and historical sciences, philosophy and religion Alan Day, Marilyn Mullay, Priscilla Schlicke, Joan M.
