Welcome to Cyberschool David Trend, 2001-07-11 *Welcome to Cyberschool* is a book about two highly charged and often emotional discussions in today's society. One concerns the optimism and promise surrounding information technologies of computers and the internet; the other involves the growing pessimism and despair about the nation's schools. These narratives of technological optimism and educational pessimism converge with increasing frequency as school groups, community leaders, and political rivals battle each other over the best way to wire the nation's schools: computerize every classroom and leave no child behind. *Welcome to Cyberschool* is the first book-length analysis of this confluence of technology and education in the information age. Scientific American, 2003 **Visual Messages** David M. Considine, Gail E.

Haley, 1999-04-15 Connect the curriculum of the classroom with the curriculum of the living room. This new edition of Considine and Haley's pioneering work helps you institute and maintain a viable program in visual or media literacy. Fascinating background information on the visual literacy movement is followed by dozens of effective strategies and classroom activities that are ready to implement, plus lists of resources for further exploration. The activities span the curriculum and teach your students the critical viewing and media literacy skills they need in our media-oriented world. All activities are coded by grade level and curriculum area. This is a vital resource for an emerging area of study. **Rethinking Media Education** Anita Nowak, Sue Abel, Karen Ross, 2007 This collection discusses and analyzes the efficacy of media education around the world, paying particular attention to whether and how it improves the critical thinking skills of students.
