## WHAT AND WHERE ARE MIDDLE SCHOOLERS LEARNING ABOUT SOCIAL MEDIA?

In a mixed method study, we surveyed **229 school staff members** and **419 parents** from 4 school districts in the Northeast and interviewed 30 parents and 6 school staff members.

### Most frequently discussed topics amongst educators:

49% of educators discussed how student technology use **interferes with sleep**

46% of educators discussed students **craving constant access to devices**

43% of educators discussed considering **how online posts affect others**

### Most frequently discussed topics amongst parents:

With 92% of parents reporting discussing **stranger danger**, it was the most popular topic from our survey

90% of parents discuss **cyberbullying** and mean online behaviors

85% of parents warned their children of being influenced by **peer-induced risky behaviors** online (vaping, skipping school, alcohol, etc.)

## FINDINGS

- Educators focused on the prevention of their students being victimized by their own addictive and self-regulatory behaviors while parents focused more on preventing their teens from unsafe or risk-taking online peer influences.
- The fact that educators and parents **focus on different aspects** of the digital wellbeing of the child could be turned into a strength of a home-school partnership that is not competing but **complementary** with one another.

**The Routledge Handbook of Health Communication** Teresa L. Thompson, Nancy Grant Harrington, 2021-09-30 A seminal text in the field this new edition of *The Routledge Handbook of Health Communication* provides students and scholars with a comprehensive survey of the subject's key research foundations and trends authored by the discipline's leading scholars. The third edition has been completely updated and reorganized to guide both new researchers and experienced scholars through the most critical and contemporary topics in health communication today. There are eight major sections covering a range of issues including interpersonal and family health communication, patient-provider communication, healthcare provider and organizational health communication, mediated health communication, campaigns, interventions, and technology applications, and broad issues such as health literacy, health equity, and intercultural communication. Attention also is devoted to foundational issues in health communication such as theory and method, multidisciplinary, interdisciplinary, and transdisciplinary communication, research, research translation, implementation, and dissemination, and narrative health communication. There is new attention to policy and NGOs, the environment, public health crises, global health, mental health, and mental illness, and marginalized populations such as Black, Latinx, and Native First People and LGBTQ individuals, as well as the multiple challenges health communication researchers face in conducting research. The handbook will continue to serve as an invaluable resource for students, researchers, scholars, policymakers, and healthcare professionals doing work in health communication.
