Trauma Healing Readers Choice:

A Trauma Theory Reading of the Book of Job Michelle Keener, 2025-06-12 Michelle Keener incorporates advances in modern trauma theory in the interpretation of the book of Job. Keener focuses primarily on using the framework of a psychological trauma narrative to read the text, providing new insights into how Job functions as a text that deals with trauma. After an extensive introduction to the history and fundamentals of trauma theory, Keener actively applies a trauma theory reading to the book of Job with special attention paid to the elements of a therapeutic trauma narrative: its role in the cognitive resolution of trauma and how this is reflected in the biblical text. This approach provides alternative answers to some of the suggested redactions, reconstruction, and inconsistencies identified in the text of Job by previous scholars. Keener also draws in the Wesleyan Quadrilateral as a means of reading the texts and examines how her conclusions may be useful in applied community contexts.

Heal Your Brain Clare E. Steffen Ed.D. BCC, 2022-10-04 Offering a holistic approach to brain health, Dr. Clare Steffen provides a blend of widely accepted and evidence-based approaches in conjunction with her own tested techniques. In *Heal Your Brain: Ninety Day Devotional*, she suggests an array of ideas to keep your brain healthy along with ways to repair and maintain brain health. Dedicating 90 days to prayerful reflection will assist you in developing a sense of well-being. If you're struggling with family issues, trauma, grief, or loss, ADD, ADHD, substance use, recovery, shame, or some other condition, you can learn to manage and regulate your brain health. Steffen details methods she's cultivated and developed after working thirty years as a psychologist, naturopath, counselor, educator, addiction counselor, life wellness business, and brain coach. Steffen underscores the importance of brain health from prevention to maintenance, recovery, and beyond. The practices detailed in *Heal Your Brain* provide an important part of the healing process and give you a jump start in rewiring your brain to live an integrative, sustainable life. It asks you to make a commitment to yourself to be well and to establish a philosophy for living based on wellness by choice. Integrate these methods into your approach to daily living and sustain wellness for life.

8 Keys to Safe Trauma Recovery Babette Rothschild, 2010-03-01 Safe and effective principles and strategies for recovery from trauma. Trauma recovery is tricky; however, there are several key principles that can help make the process safe and effective. This book gives self-help readers, therapy clients, and therapists alike the skills to understand and implement eight keys to successful trauma healing: mindful identification of what is helpful, recognizing survival, having the option to not remember, creating a supportive inner dialogue, forgiving, not being able to stop the trauma, understanding and sharing shame, finding your own recovery pace, mobilizing your body, and helping others. This is not another book promoting a new method or type of treatment; rather, it is a necessary adjunct to self-help and professional recovery programs. After reading this book, readers will be able to recognize their own individual needs and evaluate whether those needs are being met. They will have the tools necessary to put themselves in the driver's seat, navigating their own safe road to recovery.

Imagine what It's Like Victoria Bonebakker,2008 The intersection of wisdom and science is the territory of this anthology ground that is contested sometimes harrowing and often ennobling The human experience of health care whether ancient or modern has always engaged those who practice it and those who encounter it as patients Both those who live with illness of body and mind and those who live and work alongside the patients crave the opportunity to reflect on their experiences In recent years practitioners and patients alike have called attention to a crisis in our collective experience of medicine There is a growing awareness of very different cultural expectations about the nature and treatment of illness The intersection of medicine and the humanities is busy Machinery seems to crowd the space while human encounters are often brief and deeply unsatisfying to patients and caregivers alike Despite disparate approaches to the crisis in health care from economics to ethics there is agreement that patients and the world of medicine need more time together so that illness does not find expression only in the context of the emergency room It is as a response to the collective sense of crisis and alienation that Imagine What It s Like has been constructed Inside and outside the health care community many have called for the chance to use the humanities not only as opportunities to reflect on their own experiences but also as a means of improving the experiences of all of us whose lives will be touched by illness and healing birth and death Created by the Maine Humanities Council for its Literature and Medicine Humanities at the Heart of Health Care programs Imagine What It s Like contains eighty three selections ranging from poems to short stories

to excerpts from longer works The selections are divided into five sections The Experience of Illness Beginnings and Endings Trauma and Recovery Coming to Terms and Healing Costs and are followed by suggestions for longer readings

Executive Selection David L. DeVries,1993 This report an expanded version of the working document that anchored the 1992 Center for Creative Leadership conference on executive selection summarizes and evaluates the contributions of research and practice to the understanding of how to choose the most effective leaders for organizations Following a brief look at the realities of organizational performance that have led to the growing interest in executive selection an overview of executive selection is presented in the form of nine observations Each observation is comprised of a literature review and recommendations to improve practice The observations are summarized as follows 1 There is much new research from the last 30 years to help increase the odds of picking successful executives 2 corporate executives are not using personnel selection tools 3 a holistic context rich approach is most significant 4 opportunities for managerial growth should be maximized throughout the careers of all candidates 5 more accurate and detailed performance measures of how executives perform must be developed 6 assessment models must be appropriate to the 21st century 7 hiring external candidates poses risks to both the candidate and the organization 8 organizations must promote diversity in leadership by including women and people of color and 9 there is a need to get past ennui and miscommunication about executive selection Appendices contain a list of the conference s principal speakers definitions and list of further questions Contains 108 references LMI
