

The Ultimate Guide to

Value vs. Growth Investing: Which Strategy Wins?

A conceptual illustration of investment growth. A large, leafy tree with a thick trunk is shown growing out of a massive, tall stack of coins. The coins are stacked in a way that forms a solid base for the tree, suggesting that the tree's growth is directly tied to the accumulation of capital. The background is dark and moody, with some blurred light spots on the left side, creating a sense of depth and focus on the tree and its foundation.

Blockchain Fundamentals for Web 3.0 Mary C. Lacity, Steven C. Lupien, 2022-10-07. Our book explains the movement to establish online trust through the decentralization of value, identity, and data ownership. This movement is part of Web 3.0, the idea that individuals rather than institutions will control and benefit from online social and economic activities. Blockchain technologies are the digital infrastructure for Web 3.0. While there are many books on blockchains, crypto, and digital assets, we focus on blockchain applications for Web 3.0. Our target audience is students, professionals, and managers who want to learn about the overall Web 3.0 landscape, the investments, the size of markets, major players, and the global reach, as well as the economic and social value of applications. We present applications that use Web 3.0 technologies to unlock value in DeFi, NFTs, supply chains, media, identity, credentials, metaverses, and more. Readers will learn about the underlying technologies, the maturity of Web 3.0 today, and the future of the space from thought leaders. This textbook is used by undergraduate and graduate Blockchain Fundamentals courses at the University of Arkansas, the University of Wyoming, and other universities around the world. Professors interested in adopting this book for instructional purposes are welcome to contact the authors for supporting instructional materials.
