Schmelzer, PhD, 2018-02-06 For survivors of PTSD and repeated relational trauma and the people who love them Gretchen Schmelzer watched too many people quit during treatment for trauma recovery They found it too difficult or too frightening or just decided that for them it was too late But as a therapist and trauma survivor herself Dr Schmelzer wants us to know that it is never too late to heal from trauma whether it is the suffering caused within an abusive relationship or PTSD resulting from combat Sometimes what feels like a big setback is actually an unexpected difficult step forward So she wrote Journey Through Trauma specifically for survivors to help them understand the terrain of the healing process and stay on the path There are three basic principles that every trauma survivor should know Healing is possible It requires courage And it cannot be done alone Traumas that happen more than once child abuse sexual abuse domestic violence gang violence even war are all relational traumas They happened inside a relationship and therefore must be healed inside a relationship whether that relationship is with a therapist or within a group Journey Through Trauma gives us a map to help guide us through that healing process see where the hard parts show up and persevere in the process of getting well We learn the five phases that every survivor must

negotiate along the way and come to understand that since the cycle of healing is not linear circling back around to a previous stage does not mean defeat it actually means progress as well as facing new challenges Authoritative and accessible Journey Through Trauma provides support for survivors and their loved ones through one of the most challenging but necessary processes of healing that anyone can face

**Sociometrics** Tian Dayton,2022-08-30 In Sociometrics Tian Dayton masterfully integrates principles of group dynamics and psychodrama therapies with insights into bodily states and feelings gained from contemporary neuroscience Sociometrics infuses therapeutic principles in an intuitive and functional program that shifts the agent of healing from the therapist to the group We learn that through sociometrics the threads of healing are woven as the client experiences a reconnection with the inner self and a connection with others Stephen W Porges PhD Distinguished University Scientist Indiana University Professor of Psychiatry University of North Carolina creator of the Polyvagal Theory Embodied relational processes designed to add experiential therapy into addiction treatment centers IOPs and one to one or group therapy settings Relational trauma can

cause a loss of connection with the self and impact our ability to engage comfortably in intimate connection with others. Feeling misread, neglected, or abused by the people we want most to be loved by is a traumatizing experience that is cumulative. When these relational wounds remain unseen and unresolved, they can become the pain pump fueling self-medicating and dysfunctional behaviors that silently pass down through generations. Sociometrics are embodied research-based processes that educate clients about trauma, grief, and resilience as they offer in the moment experiential relational trauma repair. Created by Dr. Tian Dayton to fit easily into outpatient programs, clinics, and one-to-one settings, sociometrics help to take the guesswork out of incorporating experiential therapy into treatment. They give therapists a clear process that builds momentum for deep change and personal growth. Harnessing the therapeutic power of the group, they teach skills of emotional literacy and self and co-regulation. The combination of sociometrics and simple role plays allow the body as well as the mind to find a voice. They draw on the theory base of psychodrama and sociometry, the first forms of mind-body experiential therapy created by the father of group therapy, Jacob Levy Moreno.
