This is by now a traditional technical analysis of the previous season which saw Ferrari and Michael Schumacher win again the World Drivers and Constructors championships The mechanics and chassis of each team's cars are described in great detail race after race cockpits steering wheels pedals and brakes tires suspension load and nose cones All with rich arrays of extremely attractive and useful sketches and technical designs signed by Piola which contribute to making this analysis of the maximum Formula clearer and more legible even for the less expert GP of Monaco One of the many modifications made specifically for the tortuous Monte Carlo circuit was to increase the steering angle δ of the car to about 22° To do that the front suspension arms of many cars were modified to avoid them coming into contact with the wheels Williams adopted arms 1 altered in the area near the upright which was decidedly tapered Note the double air flow deviators 3 that begin in the area on the inside of the wheels As with most cars Williams substituted the barge boards mounted behind the wheels on the major part of the cars

Paths to Success Charles C. Harrington, Susan K. Boardman, 2000-10-16 Who would have thought that Joycelyn Elders born into a family that chopped cotton and trapped raccoons to survive would grow up to be Surgeon General of the United States Or that Clarence Thomas brought up by his barely literate grandfather would someday be a Justice of the Supreme Court Certainly not statisticians who tell us that impoverished backgrounds are fairly accurate predictors of impoverished futures This book seeks out the stories behind the exceptions those who against all odds have made the American myth of rags to riches a reality For more than ten years Charles Harrington and Susan Boardman

explored the life histories of successful Americans forty to fifty five years old those from poor homes whose parents had not completed high school and those from the middle class Comparing the routes to success of these two groups the one by various courses of their own construction the other by a well laid path the authors are able to show where their efforts and qualities diverge and where they coincide Joycelyn Elders and Clarence Thomas are examples of the pathmakers of this work While Paths to Success reveals certain consistencies between these pathmakers approaches and those of their middle class counterparts it also exposes striking differences between men and women blacks and whites These differences fully described here illuminate the ways in which opportunities serendipities and impediments intersect with personal resources strategies and choices to produce success where we least expect it
