Foreign Policy Decision Making Revisited:

Foreign Policy Decision-Making (Revisited) R. Snyder, H. Bruck, B. Sapin, Valerie Hudson, 2003-01-03 This classic work has helped shape the field of international relations and especially influenced scholars interested in how foreign policy is made At a time when conventional wisdom and traditional approaches are being questioned and when there is increased interest in the importance of process the insights of Snyder Bruck and Sapin have continuing and increased relevance Prescient in its focus on the effects on foreign policy of individuals and their preconceptions organizations and their procedures and cultures and their values Foreign Policy Decision Making is of continued relevance for anyone seeking to understand the ways foreign policy is made Their seminal framework is here complemented by two new chapters examining its influence on generations of scholars the current state of the field and areas for future research *Foreign Policy Decision-making* Richard Carlton Snyder, 1962 *Environmental Politics and Foreign Policy Decision Making in Latin America* Amy Below, 2014-12-05 Although the Kyoto Protocol an international agreement to address global climate change has been regarded by many as an unsuccessful treaty both politically and environmentally it stands as one of the world's few truly global agreements Why did such a diverse group of countries decide to sign and or ratify the treaty Why did they choose to do so at different times and in different ways What explains their foreign policy behavior Amy Below's book builds off the increasing significance of climate change and uses the Kyoto Protocol as a case study to analyze foreign policy decision making in Latin America Below's study takes a regional perspective in order to examine why countries in Latin America made disparate foreign policy choices when they were faced with the same decision The book looks at the decisions in Argentina Mexico and Venezuela via a process tracing method Below uses information obtained from primary and secondary documents and elite interviews to help reconstruct the processes and augments her reconstruction with a content analysis of Conference of the Parties speeches by presidents and country delegates The book complies with convention in the field by arguing that systemic national and individual level factors simultaneously impact foreign policy decisions but makes the additional claim that role theory most accurately accounts for relationships between variables *Environmental Politics and Foreign Policy Decision Making in Latin America* considers a variety of factors on individual national and international levels of analysis and show that the foreign policy decisions are best viewed through the prism of role theory The book also draws conclusions about the value of role theory in general and about environmental foreign policy decisions in developing countries which will be of value to both policy makers and academics *Foreign Policy in the Twenty-First Century* Christopher Hill, 2015-11-02 In the years since 9/11 followed by the wars in Iraq and Afghanistan public attention the world over has been on foreign policy From the United States to Yemen from China to Venezuela the quality of the decisions taken by politicians and diplomats has been under the closest scrutiny What is more with the increased personal mobility created by globalization many individuals and groups now focus as much on international events as on affairs within their own state Diasporas

company managers humanitarian volunteers and other non state actors are aware of the necessity for effective diplomacy to secure the outcomes they hope for This revised and retitled new edition of the author s acclaimed *The Changing Politics of Foreign Policy* provides the concepts and analysis needed to make sense of contemporary developments in this key site of political action It provides a clear and engaging synthesis of what foreign policy means in the twenty first century and shows how it can vary according to regime level of development and geopolitical position Stressing the interplay between context and shared dilemmas it examines how actors including the many non and sub state entities which have developed international strategies engage and attempt to manage their differences within a network of complex multilateral relationships Written by a leading scholar of international renown this new edition has been updated throughout with particular attention given to contemporary issues such as soft power transnational security challenges and the role of regional actors such as the European Union New to this Edition Substantially revised and updated new edition of an extremely influential acclaimed and widely used foreign policy text Updated coverage of events and theory

The Road to War in Iraq: Comparative Foreign Policy Analysis Chris Featherstone, 2025-04-09 This book combines three Foreign Policy Analysis FPA models to explain both how and why the US and UK decided to invade Iraq in 2003 These three FPA models each examine a different but closely related aspect of the individual level of decision making Firstly Groupthink examines how pathologies of small group decision making affected the processes in the US and UK decision to invade Iraq Secondly the Leadership Style framework examines how the individual leader s style of exercising their leadership affected the navigation of the decision making process Thirdly analogical reasoning examines how decision makers frame their actions both in their own decision making and in how they present their decision to the wider public By achieving these objectives *The Road to War* contributes to the field of FPA and to our understanding of how the decision to invade Iraq was taken The comparative use of these FPA models within a single framework means that this book responds to the calls for multifactorial research within FPA proposing and testing a framework that provides more complex answers through adopting a multifactorial framework These more nuanced complex answers then reveal more about the role of the individuals involved in the decision to invade Iraq and how their cognition affected the process that led to the decision to invade

U.S. Foreign Policy Donald M. Snow, Patrick J.
