Learning to Forget David Fitzgerald, 2013-06-26 Learning to Forget analyzes the evolution of US counterinsurgency COIN doctrine over the last five decades Beginning with an extensive section on the lessons of Vietnam it traces the decline of COIN in the 1970s then the rebirth of low intensity conflict through the Reagan years in the conflict in Bosnia and finally in the campaigns of Iraq and Afghanistan Ultimately it closes the loop by explaining how by confronting the lessons of Vietnam the US Army found a way out of those most recent wars In the process it provides an illustration of how military leaders make use of history and demonstrates the difficulties of drawing lessons from the past that can usefully be applied to contemporary circumstances The book outlines how the construction of lessons is tied to the construction of historical memory and demonstrates how histories are constructed to serve the needs of the present In so doing it creates a new theory of doctrinal development

Dying to Learn Michael A. Hunzeker, 2021-07-15 In Dying to Learn Michael Hunzeker develops a novel theory to explain how wartime militaries learn He focuses on the Western Front which witnessed three great power armies struggle to cope with deadlock throughout the First World War as the British French and German armies all pursued the same solutions assault tactics combined arms and elastic defense in depth By the end of the war only the German army managed to develop and implement a set of revolutionary offensive defensive and combined arms doctrines that in hindsight represented the best way to fight Hunzeker identifies three organizational variables that determine how fighting militaries generate new ideas distinguish good ones from bad ones and implement the best of them across the entire organization These factors are the degree to which leadership delegates authority on the battlefield how effectively the organization retains control over soldier and officer training and whether or not the military possesses an independent doctrinal assessment mechanism Through careful study of the British French and German experiences in the First World War Dying to Learn provides a model that shows how a resolute focus on analysis command and training can help prepare modern militaries for adapting amidst high intensity warfare in an age of revolutionary technological change
