Pluralist Publics in Market Driven Education Ruth Boyask, 2020-06-11 Pluralist Publics in Market Driven Education opens a conversation on the nature of the public in education systems weary from market driven educational reform Ruth Boyask observes the characteristic of publicness within contemporary education settings a characteristic defined by tools from public sphere and democratic education theory Boyask's investigations of publicness in educational sites are founded in conceptualising public education as pluralist

unbounded and conditional These concepts of the public are important for ongoing and future debate on public education

The settings Boyask examines are different in structure function and location yet each demonstrates the push and pull between market relations including competition efficiency and productivity and the desire for social equality and democracy in education Examples of educational settings are drawn broadly from an Anglo American imaginary that has taken hold in educational systems transnationally with detailed observation from three research studies of education policy enactment in England The research studies including research on curriculum reform in a private democratic school privatisation of regional educational services and governance in English private schools provide contexts for examining public accountability public service and the public good as they relate to a reconceptualised public education Boyask s argument is that by opening a conversation about the nature of the public within these sites we bring them into the spheres of a pluralist public education They become open to public scrutiny and through their debate arise new ideas for challenging market driven restrictions to contemporary public education

*Dogs, Past and Present* Ivana Fiore, Francesca Lugli, 2023-09-07 This volume gathers contributions from scholars from a variety of disciplines to provide a comprehensive assessment of the importance of dogs through history There is a focus on the necessity of an interdisciplinary perspective to fully understand the fundamental role that dogs have played in our past

**European Identity and Citizenship** Sanja Ivic, 2016-06-08 This book uses a theoretical and empirical approach to explore the philosophies of European citizenship and European identity The author applies a focused analytical framework to argue that European identity and citizenship should be perceived as postmodern categories which are multi layered dynamic and fluid The book offers a detailed review of political and legal studies which do not comprehend or explain postmodernist concepts of citizenship and identity In the theoretical part of the book various philosophical models of citizenship and identity from antiquity to the postmodern era are portrayed and the author s own theory and analytical framework is developed The empirical part of the book discusses a variety of case studies illustrating how European Union policies apply to this framework

**Uses of the Other** Iver B. Neumann, 1999 The field of

international relations has recently witnessed a tremendous growth of interest in the theme of identity and its formation construction and deconstruction In *Uses of the Other* Iver B Neumann demonstrates how thinking about identity in terms of the self and other may prove highly useful in the study of world politics Neumann begins by tracing the four different paths along which this thinking has developed during this century ethnographic psychological Continental philosophical and Eastern excursion and he shows how these blended at the margins of the discipline of international relations at the end of the 1980s There follow several incisive readings of European identity formations on the all European regional and national levels The theme that draws these readings together is how the East is used as a sign of otherness at all three levels Whereas previous studies framed this process as part of colonial and postcolonial developments this book suggests that Easternness is also present as a marker in contemporary discourses about Russia Turkey Central Europe and Bashkortostan among others

**Ideas Of/for Europe** Teresa Pinheiro, Beata Cieszyńska, José Eduardo Franco, 2012 The current attempt in European politics to develop a European identity makes scientific research about discourses on Europe especially relevant This book takes an analytical gaze at philosophical and political attempts to conceptualise Europe from antiquity to the present and contributes to the understanding of how they are intertwined with the historical contexts in which they have been forged The volume offers an interdisciplinary approach to the topic of ideas of and for Europe historical concepts of Europe Europe as seen from its peripheries and from outside current concepts of European identity European memorial culture and reflections on Europe's prospects and is of special interest to anyone concerned with questions of European identity *Citizenship and Collective Identity in Europe* Ireneusz Paweł Karolewski, 2009-12-04 This book is the first monograph to systematically explore the relationship between citizenship and collective identity in the European Union integrating two fields of research citizenship and collective identity Karolewski argues that various types of citizenship correlate with differing collective identities and demonstrates the link between citizenship and collective identity He constructs three generic models of citizenship including the republican the liberal and the caesarean citizenship to which he ascribes types of collective identity Using a multidisciplinary approach the book integrates concepts theories and empirical findings from sociology in the field of citizenship research social psychology in the field of collective identity legal studies in the chapter on the European Charter of Fundamental Rights security studies in the chapter on the politics of insecurity and philosophy in the chapter on pathologies of deliberation to examine the current trends of European citizenship and European identity politics This book will be of interest to students and scholars of European politics political theory political philosophy sociology and social psychology *Cultural Diversity, European Identity and the Legitimacy of the EU* Dieter Fuchs, Hans-Dieter Klingemann, 2011 As a consequence of various rounds of EU enlargements the degree of cultural diversity in Europe has intensified a phenomenon which is increasingly perceived as problematic by many EU citizens This fascinating book not only empirically explores the current state of the identity and the legitimacy of the EU as viewed by its citizens but also evaluates

their attitudes towards it The expert contributors show that the development of a European identity and a common European culture is a prerequisite for European integration that European identity and a common political culture will not develop rapidly but emerge slowly and that the beginnings of a European identity and a common European culture are currently emerging The roles of civil society organizations and political parties are examined within this context and an explanatory model with subjective predictors of the attitudes towards the EU is tested The empirical analysis is underpinned by a theoretical framework incorporating operational definitions and conceptual discussion of legitimacy and identity This intriguing and thought provoking book will be of great interest to academics researchers and students focusing on political science and international relations

**Post-identity?** Richard McMahon, 2013-06-26 Collective identity the emotionally powerful sense of belonging to a group is a crucial source of popular legitimacy for nations However efforts since the 1990s to politically support European integration by using identity mechanisms borrowed from nationalism have had very limited success European integration may require new post national approaches to the relationship between culture and politics This controversial and timely volume poses the logical question if identity doesn't effectively connect culture with European integration politics what does The book brings together leading scholars from several of the disciplines that have developed concepts of culture and methods of cultural research These expert interdisciplinary contributors apply a startling diversity of approaches to culture linking it to facets of integration as varied as external policy the democratic deficit economic dynamism and the geography of integration This book examines commonalities and connections within the European space as well as representations of these in identity discourses It will be useful for students and scholars of sociology geography anthropology social psychology political science and the history of European integration

**From European Identity to a Social Europe?** Felix Wilke, 2010-03 **Experiencing European Integration** Theresa Kuhn, 2015-01-15 European integration has generated a wide array of economic political and social opportunities beyond the nation state European citizens are free to obtain their academic degree in Germany earn their money in London invest it in Luxembourg and retire to Spain An early theorist of European integration Karl Deutsch expected this development to promote a collective identity and public support for European integration by interacting across borders Europeans would become aware of their shared values and beliefs and eventually acquire a common we feeling Experiencing European Integration puts these expectations under scrutiny by developing a comprehensive theoretical model that helps us understand how transnational interactions relate to orientations towards European integration An extensive analysis of survey data covering the 27 EU member states provides a thorough empirical test of transactionalist hypotheses Findings show that individual transnationalism indeed strongly and positively influences EU support but that only a young wealthy and highly educated minority take part in cross border interactions The book further shows that the effectiveness of transnational interactions in generating EU support is contingent on a number of factors such as their purpose and scope Importantly increased transnational interactions result in

negative externalities among those who do not become transnationally active themselves By discussing the implications of transnationalism for the theoretical debate and current policy this volume will provide a unique analysis of a key dynamic of European integration

**European Identities in Discourse** Franco Zappettini, 2019-05-02 Based on empirical research this book closely analyses how European identities are discursively produced It focuses on discourse from members of a civic association active in promoting democracy and attempting participation in the transnational public sphere Unlike previous books that have addressed the question of European identity from top down stances or through methodological nationalism this book engages with the multifaceted concept of transnationalism as a key to the negotiation of glocal identities Applying a discourse historical approach DHA through a transnational reading it shows how grassroots actors speakers construct their different cultural and political affiliations as both world and European citizens They negotiate institutional identities and historical discourses of nationhood through new forms of mobility cultural diversity and the imagination of Europe as a proxy for a cosmopolitan civil society These discourses are ever more important in a fractured and polarised Europe falling prey to contrary discourses of nationhood and ethnic solidarity Highlighting how transnational narratives of solidarity and the de territorialisation of civic participation can impact on the re imagination of the European community beyond tropes like Fortress Europe or intragovernmental politics this important book shows how identification processes must be read through historical and global as well as localised contexts
