

- It is best to keep a space cushion on all sides of your vehicle.

### KEEP A SPACE CUSHION AHEAD (4-SECOND RULE)

- What is a safe following distance? A 4-second following distance, as shown above in **Area 1** of the space management diagram, will allow you to steer or brake to avoid a hazard safely on the highway, if the pavement is dry.
  - If you are following too closely and the vehicle ahead of you stops or slows suddenly, you will not be able to avoid a crash.
  - Keeping a safe following distance will enable you to react to a problem ahead without the need for a panic stop, which could cause a following driver to crash into the back of your vehicle.
  - To determine your following distance, watch the rear bumper of the vehicle ahead of you. When the bumper passes a road marking or a roadside object like a telephone pole, start counting how many seconds it takes you to reach the same spot on the road. If you pass the marking or object in less than four (4) seconds, you are following too closely.
- Sometimes you will need extra space ahead of you.**
- Allow a longer following distance than usual when:**
- Traveling on roads that are wet and slippery, or not paved - there is less traction, so it takes longer to stop.
  - The driver behind you wants to pass - there must be room ahead of you for the passing driver to pull in front of you.
  - You are following a driver whose rear view is blocked - drivers of trucks, buses, vans, or cars pulling campers or trailers may slow down suddenly without knowing you are behind them.
  - You are following a large vehicle blocking your view ahead - you need extra room to see around the vehicle.
  - You are following a driver who is carrying a heavy load or pulling a trailer - the extra weight will make it more difficult to stop.
  - Approaching slow moving vehicles, including bicycles.
