Walters,2013-02-15 This book provides an overview and analysis of the many facets of the drug crime relationship The opening chapters discuss drugs and crime separately for the purpose of setting the stage for later discussions on drug crime relationships As the book proceeds the boundaries between drugs and crime blur thus revealing the complex and intimate relationship that links these two behaviors Drugs Crime and Their Relationship is divided into four sections The first section offers an introduction and overview of theories on drugs crime and their relationship The second section explores the relevant research on the biological psychological sociological and static situational correlates of drug crime relationships The third section considers the practical implications of drug crime connections for the criminal justice system offender assessment and treatment programming The fourth and final section examines the policy implications of the drug crime relationship in the form of prevention harm reduction and society s response to drugs and drug related crime **The**

Routledge International Handbook of Biosocial Criminology Matt DeLisi,Michael Vaughn,2014-12-05 Biosocial criminology is an interdisciplinary field that aims to explain crime and antisocial behavior by exploring both biological factors and environmental factors Since the mapping of the human genome scientists have been able to study the biosocial causes of human behaviour with the greatest specificity After decades of almost exclusive sociological focus criminology has undergone a paradigm shift where the field is more interdisciplinary and this book combines perspectives from criminology and sociology with contributions from fields such as genetics neuropsychology and evolutionary psychology The Routledge International Handbook of Biosocial Criminology is the largest and most comprehensive work of its kind and is organized into five sections that collectively span the terrain of biosocial research on antisocial behavior Bringing together leading experts from around the world this book considers the criminological genetic and neuropsychological foundations of offending as well as the legal and criminal justice applications of biosocial criminological theory The handbook is essential reading for students researchers and practitioners from across the social behavioural and natural sciences who are engaged in the study of antisocial behaviour **The Handbook of Juvenile Delinquency and Juvenile Justice** Marvin D. Krohn,Jodi

Lane,2015-04-27 This handbook is an up to date examination of advances in the fields of juvenile delinquency and juvenile justice that includes interdisciplinary perspectives from leading scholars and practitioners Examines advances in the fields of juvenile delinquency and juvenile justice with interdisciplinary perspectives from leading scholars and practitioners Provides a current state of both fields while also assessing where they have been and defining where they should go in years to come Addresses developments in theory research and policy as well as cultural changes and legal shifts Contains summaries of

juvenile justice trends from around the world including the US the Netherlands Brazil Russia India South Africa and China Covers central issues in the scholarly literature such as social learning theories opportunity theories criminal processing labeling and deterrence gangs and crime community based sanctions and reentry victimization and fear of crime

Modelling the Criminal Lifestyle Glenn D. Walters, 2017-11-24 This book offers Walters's latest evolution of criminal lifestyle theory. It introduces the concept of criminal thought content to illustrate how the potential interplay between what offenders think and their thought processes can greatly aid our understanding of both crime and criminals. In this new study on criminal behaviour Walters calls for criminological theory to be placed within a broader scientific context and provides us with several key models which embrace constructs from numerous important theories including the general theory of crime social cognitive and social learning theories general strain theory psychopathic personality theories of crime and labelling theory. Another unique aspect of this work is that it places lifestyle theory within a larger scientific framework namely nonlinear dynamical systems theory or chaos. Seven principles from chaos theory are used to explain relationships and processes central to lifestyle theory and Walters uses this to draw conclusions on what affects criminal decision making and desistance from crime. Highly original and innovative in scope this book will be useful to practitioners and scholars of criminal justice alike with chapters focussed on decision making assessment and intervention. *Understanding Drug Use and Abuse* Benjamin P. Bowser, Carl O. Word, Toby Seddon, 2014-05-30 Addressing drug use and abuse as a global phenomenon this text draws on contemporary and international research findings to examine the causes of drug use in different countries and to explore different policy responses to its prevention and treatment. It is an invaluable resource for students practitioners and anyone concerned with drug use. **Crime & Justice International**, 2002 *Criminology, Penology, and Police Science Abstracts*, 1995 Universal Reference System Springer, Springer London, Limited, 1980-10-01 Political Science Abstracts IFI-Plenum Data Company Staff, 1983-11-01 *Programs and Courses* University of Northern Iowa, 2006 *Items - Social Science Research Council* Social Science Research Council (U.S.), 1993 **Sociological Abstracts** Leo P. LaMond Tullis, LaMond Tullis, United Nations Research Institute for Social Development, 1991-09-30 Focusing on a highly controversial and fiercely debated subject this survey tracks the social and economic consequences of the production trafficking and consumption of cocaine heroin and cannabis. From a growing body of literature LaMond Tullis has extracted

the most salient economic social and political themes currently under discussion in both scholarly publications and in the responsible press The two part volume consisting of a lengthy review of relevant literature and an annotated bibliography helps its users understand the major issues Can and should consumption be curtailed supplies suppressed and traffickers eliminated Can the unintended economic social and political consequences of curtailing suppressing and eliminating somehow be mitigated Should these drugs be legalized Would legalization produce its own array of unintended and largely unacceptable consequences Although tentative answers to these questions abound this excellent resource is testimony to the fact that there is still little agreement on how to deal with these powerful substances and the problems they generate Tullis s compilation presents the best overview of this complex subject to date The first half of this two part reference consists of a survey of the published literature on the production and consumption of the three illicit drugs Chapters are devoted to the global patterns of production and consumption of cocaine heroin and cannabis to the consequences both positive and negative of drug consumption and production and to the policy measures that have been adopted or are under consideration in both consuming and producing countries These chapters will be of interest to those wishing to obtain an overall view of the subject and to specialists seeking a guide to the literature outside their particular area of knowledge The second half of the book contains an annotated bibliography of about 2 000 items covering works published in English plus a few in Spanish as books articles or press reports This section will be invaluable to researchers working on the frontiers of the subject and to general readers who wish to pursue particular topics in greater depth The volume should be at the fingertips of policy makers legislators law enforcement officials judges and social workers as well as students and teachers *Journal of Police Science and Administration* ,1979

Contemporary Drug Policy Henry Brownstein,2013-02-11 This book focuses on the use of drugs in our lives and how we respond to them Whereas drug policy typically centres on the problems of illicit drugs or licit drugs used in illicit ways or circumstances Contemporary Drug Policy instead considers the wide variety of substances we call drugs as a normal part of our personal and social experience and asks how and when drugs benefit us as well as how and when they are harmful The evidence is clear that at some times in some circumstances and in some places drugs are a problem This book does not ignore these issues but shifts our attention to making policies that also recognize their legitimate and constructive place in society It focuses on asking questions challenging assumptions and developing responses to drugs based on evidence from scientific study as directed by critical criminological theory rather than mainstream theory or unfounded assumptions Different from other books on drug policy this book does not offer answers or solutions Rather it shows how critical criminological theories can lead scientific research in new directions supportive of policies that offer both solutions to problems that are found to be related to drugs and an appreciation for the benefits that drugs can bring to people and society This book will be of interest to those studying or researching drug policy as well as professionals involved in policy making processes **Criminology & Penology Abstracts** ,1991
