Myers,2013-08-21 First Published in 1993 Succession between international organizations is a controversial topic What is it about the topic that provokes such diverse reactions Is there really such a thing as succession between international organizations Does it resemble any other form of succession or is it something completely different The present study is an attempt to shed some light on this little known area of international law "The" Mind in the World Sudhir Kakar,2024 **Gesammelte Schriften** Max Rheinstein,1979 International Labour Documentation International Labour Office. Micklitz,Andrea Wechsler,2016-04-07 This insightful book considers the phenomenon of the transformation of enforcement in European economic law while adopting a distinct global perspective

The editors identify and respond to the need for reflection on transformation processes in the area of enforcement by bringing together the leading international and European scholars in a variety of disciplines to share and compare experiences and learning in different areas of law. Rooted in a wide and regulatory understanding of enforcement, this book showcases the transformation of enforcement with reference to both European economic law, especially transnational commercial law, competition law, intellectual property law, consumer law, and to the current context of significant global economic challenges. Comparative perspectives facilitate the formation of a holistic perspective on enforcement that reaches beyond distinct theoretical accounts, political agendas, regulatory systems, institutional patterns, particular remedies, industry sectors, and stakeholder perspectives. As the first comprehensive and comparative analysis of the enforcement of European economic law that reaches beyond closely confined areas of law, it constitutes a crucial contribution to the theoretical and policy questions of how to design a coherent European enforcement architecture in accordance with essential principles and objectives of the EU economic order. This unique study will have broad appeal. By exploring enforcement transformations from a legal and a cross disciplinary perspective, it will be essential reading for scholars, practitioners, and policymakers from different disciplines.

Force Majeure and the Law: Acts of God in Comparative and Historical Perspective Thomas D. Musgrave, 2025-04-08. This book examines how the Roman, French, and English legal systems have each dealt with the issue of unforeseen supervening events which have rendered the performance of contractual obligations either impossible or fundamentally different in nature, sometimes known as Force Majeure or Acts of God. Although the Roman, French, and English laws of contract have each developed legal rules which address this issue, the approach adopted by each system is significantly different from that of the others. The thesis of this book is that the response of a legal system to unforeseen supervening events derives primarily from the nature and structure of that legal system as a whole, and then within that broader context from the salient characteristics of that system's particular law of contract. The work compares the differing nature and structure of the Roman, French, and English legal systems and their respective laws of contract in order to demonstrate how this is so. The book will be a valuable guide for academics and researchers working in the areas of Comparative Law, Legal History, Legal Theory, and Contract Law. As the English approach to unforeseen supervening events is very different from that of the French, the book will be of benefit both to English and to French practitioners as they seek to understand how supervening events are dealt with across the Channel. It will also appeal to law students as a guide for studying comparative law.
