Drone Survival Guide:

Drone Ethel Baraona Pohl, Marina Otero Verzier, Malkit Shoshan, 2018-03-09 Drone brings together researchers from diverse disciplinary backgrounds whose work seeks to understand and represent the nature and extent of drone operations. The book investigates the relationship between drone technology, cultural production and forms of surveillance and violence. It analyses and speculates upon how these technological developments affect life in cities. Drone is the first volume of Unmanned Architecture and Security Series, a research and publishing project which examines architecture's role in the construction of the contemporary security regimes. The series discusses the consequences of the civilian appropriation of military technologies and sets an agenda for design professionals to engage on a technological, cultural and political level by putting forward forms of resistance.

The Good Drone Austin Choi-Fitzpatrick, 2020-07-28 How small scale drones, satellites, kites and balloons are used by social movements for the greater good. Drones are famous for doing bad things, weaponized they implement remote control war, used for surveillance they threaten civil liberties and violate privacy. In The Good Drone Austin Choi-Fitzpatrick examines a different range of uses, the deployment of drones for the greater good. Choi-Fitzpatrick analyzes the way small scale drones as well as satellites, kites and balloons are used for a great many things, including documenting human rights abuses, estimating demonstration crowd size, supporting anti-poaching advocacy and advancing climate change research. In fact, he finds small drones are used disproportionately for good, nonviolent, prosocial uses predominate.

Game of Drones Jürgen Bleibler, Claudia Emmert, Goetz Herrmann, Maximilian Jablonowski, Francisco Klauser, Kathrin Maurer, Ina Neddermeyer, Marcela Suarez Estrada, Jutta Weber, 2020-08-19 Drohnen sind unbemannte Flugobjekte, deren Grenzen so unterschiedlich sind wie ihr Aussehen und ihre Nutzung. Eingesetzt werden sie für unterschiedlichste zivile Zwecke und auch um schwer zugängliche Gebiete zu erreichen, zur Kontrolle von Grenzen, Überwachung, Datensammlung sowie in der Landwirtschaft und im Dienstleistungssektor. Sie liefern Künstler:innen Fotograf:innen und Filmemacher:innen eindrucksvolle Aufnahmen und haben die Bildästhetik der Gegenwart revolutioniert. Drohnen gelten aber auch als die wichtigste Kriegstechnologie seit der Erfindung der Atombombe. Gegenwärtig sind Drohnen noch keine autonom operierenden Systeme. In Kombination mit künstlicher Intelligenz können sie aber zu unheimlichen Waffen werden. Dieser Ausbau zu lernenden und autonom agierenden Maschinen wirft auch ethische Fragen auf. Die Publikation führt die Inhalte der Ausstellung Game of Drones von unbemannten Flugobjekten und einer Fachtagung im Zeppelin Museum Friedrichshafen zusammen, die verschiedene Aspekte historischer, aktueller und zukünftiger Drohnentechnologien in vertiefter Form analysieren. Verhandelt wurden gesellschaftlich relevante Fragestellungen anhand technikhistorischer Exponate und ausgewählter Werke internationaler Künstler:innen, die Drohnentechnologien auf unterschiedlichste Weise kritisch reflektieren. Heutige Drohnen sind Weiterentwicklungen von unbemannten Ballonen, Fernlenk Waffen und Modellflugzeugen. Ausgehend von dieser historischen Verortung beschäftigt sich die Publikation mit dem Einsatz von Drohnen und ihrer hybriden Funktion.

als Spielzeug Kriegstechnologie und Wirtschaftsfaktor Als eine Technologie die absolute Gegens tze vereint wird deren Widerspr chlichkeit in all ihren Facetten aufgezeigt vom bewachungsapparat zum Instrument des Widerstands und Protests vom animistisch beseelten Objekt bis hin zum Einsatz in der strategischen Kriegsf h rung Reflektiert werden dabei auch zuk nftige Entwicklungen wie Fragen zu transhumanem Bewusstsein und K nstlicher Intelligenz

Life in the Age of Drone Warfare Lisa Parks, Caren Kaplan, 2017-10-19 This volume s contributors offer a new critical language through which to explore and assess the historical juridical geopolitical and cultural dimensions of drone technology and warfare They show how drones generate particular ways of visualizing the spaces and targets of war while acting as tools to exercise state power Essays include discussions of the legal justifications of extrajudicial killings and how US drone strikes in the Horn of Africa impact life on the ground as well as a personal narrative of a former drone operator The contributors also explore drone warfare in relation to sovereignty governance and social difference provide accounts of the relationships between drone technologies and modes of perception and mediation and theorize drones relation to biopolitics robotics automation and art Interdisciplinary and timely Life in the Age of Drone Warfare extends the critical study of drones while expanding the public discussion of one of our era s most ubiquitous instruments of war Contributors Peter Asaro Brandon Wayne Bryant Katherine Chandler Jordan Crandall Ricardo Dominguez Derek Gregory Inderpal Grewal Lisa Hajjar Caren Kaplan Andrea Miller Anjali Nath Jeremy Packer Lisa Parks Joshua Reeves Thomas Stubblefield Madiha Tahir

Disobedient Aesthetics Anthony Stagliano, 2024-03-22 Disobedient Aesthetics examines emergent forms of creative civil disobedience that have arisen in response to digital tools of surveillance and control Analyzing activities that defy by hacking subverting or otherwise thwarting efforts to use the interface of our bodies and networked technologies Disobedient Aesthetics theorizes the rhetorical and aesthetic character of such disobedient acts and the possibilities limitations and risks they pose for democratic participation In recent decades new tools of surveillance and control have become ubiquitous among them security cameras data mining in social media spaces and biometric scanning As such we all now dwell in spaces of public everyday life that entangle networked levers of control with the facticity of having bodies DNA or even faces in public Each chapter probes a different aspect of our embodied experience as sites of data exploitation The first chapter examines tactical interventions into the thermal vision systems used on military drones Human body heat itself is transformed into a media object and a source of data for lethal drone systems In the following chapter we encounter extraordinarily sophisticated facial recognition platforms that are turning our very faces into actionable data mines The next chapter examines two kinds of on demand DNA analysis at home testing like that used by 23andMe and a related police practice to show what s at stake when the hunger for personal data dives all the way into our genetic makeup The next chapter considers how surveillance and control has come to change urban governance and with it the physical space of publicness itself Data driven governance paired with home sharing platforms like AirBNB apply even more pressure on populations and have engendered new

predictive forms of policing and new architectural forms such as anti homeless spikes in public spaces The final chapter examines several different creative critical and collective efforts to democratize access to the technical knowledge needed to intervene in the control systems addressed in the prior chapters A concluding epilogue revisits current theories and manifestations of control and offers an alternative reading of Gilles Deleuze s oft cited thesis on control societies namely that with control it is not a matter of escaping it but a matter of finding new weapons to undermine its functions All of the projects and activities surveyed here do indeed attempt that but the epilogue meditates on an alternative to finding new weapons in the search for new tactics Ultimately Disobedient Aesthetics theorizes control and the possibilities of creative disobedient intervention into it as at once an aesthetic and rhetorical phenomenon with the creative disruptions of control surveyed here standing as potent models for productive paths for democratizing technology now

Retreat Ethel Baraona Pohl, Marina Otero Verzier, Malkit Shoshan, 2020-07-31 Retreat is a lexicon or inventory of language to describe the action of withdrawal from civic life By creating a spatial approach to the language of escape the publication attempts to widen the definitions of familiar terms such as safety surveillance and self reliance The lexicon draws attention to current global events such as the thread of epidemic disease climate catastrophe the militarization of public space and the impact of mass surveillance on daily life specifically the emotional and social impact of the presence of unknown and potentially life threatening elements The editorial approach for the lexicon is to investigate the notion and practices of retreat its strategies and imaginaries through others words as they inform contemporary spatial paradigms A wide variety of source types from blogs to Wikipedia to academic texts and media photographs films books objects and forms of literary genres are mobilized to create a portrait of retreat that describes not only militarized zones but dreams and anxieties of individuals across the globe helping us better understand how humans might negotiate civil and human rights and freedoms within civic society at large
