Parallel and Distributed Processing José D. P. Rolim, 1999-03-30 This book constitutes the refereed proceedings of 11 IPPS SPDP 98 Workshops held in conjunction with the 13th International Parallel Processing Symposium and the 10th Symposium on Parallel and Distributed Processing in San Juan Puerto Rico USA in April 1999 The 126 revised papers presented were carefully selected from a wealth of papers submitted The papers are organised in topical sections on biologically inspired solutions to parallel processing problems High Level Parallel Programming Models and Supportive Environments Biologically Inspired Solutions to Parallel Processing Parallel and Distributed Real Time Systems Run Time Systems for Parallel Programming Reconfigurable Architectures Java for Parallel and Distributed Computing Optics and Computer Science Solving Irregularly Structured Problems in Parallel Personal Computer Based Workstation Networks Formal Methods for Parallel Programming Embedded HPC Systems and Applications

Digital Signal Processing Paulo S. R. Diniz, Eduardo A. B. da Silva, Sergio L. Netto, 2002-04-18 Digital signal processing lies at the heart of the communications revolution and is an essential element of key technologies such as mobile phones and the Internet This book covers all the major topics in digital signal processing DSP design and analysis supported by MatLab examples and other modelling techniques The authors explain clearly and concisely why and how to use digital signal processing systems how to approximate a desired transfer function characteristic using polynomials and ratio of polynomials why an appropriate mapping of a transfer function on to a suitable structure is important for practical applications and how to analyse represent and explore the trade off between time and frequency representation of signals An ideal textbook for students it will also be a useful reference for engineers working on the development of signal processing systems

Algorithms and Architectures for Parallel Processing Sang-Soo Yeo, Jong Hyuk Park, Laurence Tianruo Yang, Ching-Hsien Hsu, 2010-05-29 It is our great pleasure to welcome you to the proceedings of the 10th annual event of the International Conference on Algorithms and Architectures for Parallel Processing ICA3PP ICA3PP is recognized as the main regular event covering the many dimensions of parallel algorithms and architectures encompassing fundamental theoretical proaches practical experimental projects and commercial components and systems As applications of computing systems have permeated every aspect of daily life the power of computing systems has become increasingly critical Therefore ICA3PP 2010 aimed to permit researchers and practitioners from industry to exchange inf mation regarding advancements in the state of the art and practice of IT driven s vices and applications as well as to identify emerging research topics and define the future directions of parallel processing We received a total of 157 submissions this year showing by both quantity and quality that ICA3PP is a premier conference on parallel processing In the first stage all papers submitted were screened for their relevance and general submission quirements These manuscripts then underwent a rigorous peer review process with at least three reviewers per paper In the end 47 papers were accepted for presentation and included in the main
